³ Customers must be qualified and approved by First American Corporation

Hardware-as-a-Service (HaaS)

Desktop Metal has partnered with First American to offer customers a flexible financing option, the Hardware-as-a-Service program. For customers seeking to obtain a Studio System using Opex rather than Capex, the HaaS program offers an affordable monthly payment option and requires no down payment. Customers may choose between a three or four year commitment, both of which include everything needed for a seamless experience with the Desktop Metal Studio System.

What are the benefits of the HaaS program?

Zero down payment	Get the Studio System without any upfront costs.
Preserves capital	With an affordable monthly payment, the HaaS program allows you to obtain the Studio System through a tax-deductible operating expense while preserving your capital expenditure budget.
Flexible	Free software and firmware upgrades ensure that your Studio System will always meet your current and future requirements.
Reliable	Installation, Warranty and Maintenance are included throughout the commitment period.

What happens at the end of the HaaS period?

At the end of the commitment period, customers may simply renew, purchase or return the hardware.
