

[Material Data Sheet]

440CHigh Carbon Martensitic Stainless Steel

| COMPOSITION % | | |
|---------------|------------|--|
| С | 0.9 – 1.25 | |
| Cr | 16 – 18 | |
| Мо | 0.75 (Max) | |
| Nb | 3.5 (Max) | |
| Ni | 0.6 (Max) | |
| Mn | 1.0 (Max) | |
| Si | 1.0 (Max) | |

| MECHANICAL PROPERTIES | | | |
|------------------------------------|-----------|-----------------------------------|-------------------------------|
| | Standard | Production System™ As Sintered | Production System™ MPIF 35 |
| Hardness (HRC) | ASTM E18 | 58 ± 1 | 56 |
| Density (g/cc) | ASTM B311 | 7.64 | - |
| Ultimate tensile strength -x (MPa) | ASTM E8M | 1104 | 1030 – 1310 |
| Elongation - x (%) | ASTM E8M | 0.6 | < 1 |
| Charpy Impact* - xy (J) | MPIF 59 | 4.33 ± 0.5 | 5 |

| ATTRIBUTES & APPLICATIONS | | |
|--|--|--|
| High hardness martensitic stainless steel | | |
| Good corrosion resistance in hardened and tempered condition | | |
| Magnetic | | |

OTHER STANDARD DESIGNATIONS

MPIF 35

Good wear resistance

End-use material performance is impacted (+/-) by certain factors including but not limited to part geometry and design, application and evaluation conditions, etc.

^{*} The charpy impact specimens are 5x10mm cross section un-notched.
